No one of the "many ills flesh is heir to' is so prevalent, so little understood, and so much neglected as Costiveness. Often originating in carelessness, or sedentry habits; it is regarded as a slight disorder of too little consequence to excite anxiety while in reality it is the precursor and companion of many of the most fatal and dangerous diseases, and unless early erad

icated it will bring the sufferer to an un-timely grave. Among the lighter evils of which costiveness is the usual attendant are Headache, Colie, Rheumatism, Foul Breath, Piles and others of like nature, while a long train of frightful diseases such as Malignant Fevers, Abcesses, Dysentry, Diarrhoea, Dyspepsia, Apoplexy, Epilepsy, Paralysis, Hysteria, Hypochon-driasis, Melancholy and Insanity, first indicate their presence in the system by this alarming symptom. Not unfrequently the diseases named originate in Constipation, but take on an independent existence unless the cause is eradicated in an early stage. From all these considerations it follows that the disorder should receive immediate attention whenever it occurs. and no person should neglect to get a box of Cephalic Pills on the first appearance of the complaint, as their timely use will expel the insiduous approaches of disease and destroy this dangerous foe to human life.
